PARTNERS IN **SUSTAINABILITY**

ABOUT REVIVE

The Revive Group produce sewer cleaning equipment for the water and wastewater industry. Since our establishment in 2020, we have supplied more than 100 units to Ireland, the UK, mainland Europe, and as far as New Zealand through our Revive program.

We also offer services to restore and improve existing units, as well as reducing waste by remounting them onto cleaner and more efficient chassis.

OUR VISION

The Revive Group is dedicated to reducing the amount of virgin steel used within the sewer cleaning industry. The production of just one tonne of new steel releases 1.9 tonnes of CO₂ into the atmosphere.

As many sewer cleaning units require a significant amount of steel, upwards of 20 tonnes, in their manufacturing process, the overall environmental impact is substantial.

Our goal is to make sure that any potential client takes these factors into consideration when deciding to purchase or rent a new machine, by promoting more sustainable options, recycling and reusing materials, and encouraging more efficient use of resources.

OUR PROCESS

Revive remanufacture, refurbish and remount new and existing sewer cleaning equipment.

OUR UNITS

We provide combination units, recyclers, tankers and more.

HENRY ROYCE

Revive **WARRIOR**

The Revive Warrior. Made to measure. Built to last.

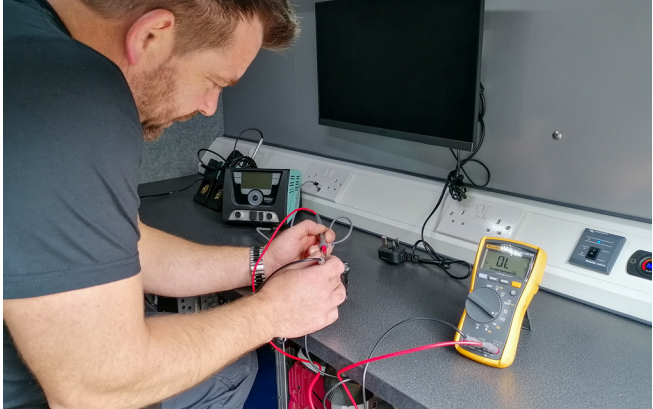

OUR TRAINING

All equipment provided by Revive comes with complete training and familiarisation.

REVIVE CCTV

The Revive Group provide CCTV equipment, as well as repairs and servicing for these systems.

Revive New Zealand are the latest addition to the Revive Group family.

A company with direct links and local knowledge, backed with the resources and support of the overall group.

Revive NZ will offer all services to the market from sales and rental to operator training and customer support.

Revive Nordics.

As Revive continue to expand as a group the Nordic Region is an area we envisage being an ideal target for our products.

Using our extensive industry contacts we have already made the first steps into this region and plan to build trucks with this area specifically in mind.

Acumec is the UK-based subsidiary of the Revive Group, which is responsible for sales, service, and distribution.

Located in Coalville, Leicestershire, Acumec's team of engineers have extensive knowledge of specialist sewer cleaning equipment.

The Home of Sustainability depot provides as a drop-in centre for maintenance and repairs, as well as a dedicated mobile service team for on-site and emergency support.

RENMAK

Renmak are a chosen reseller for The Revive Group with much of their fleet made up from our trucks.

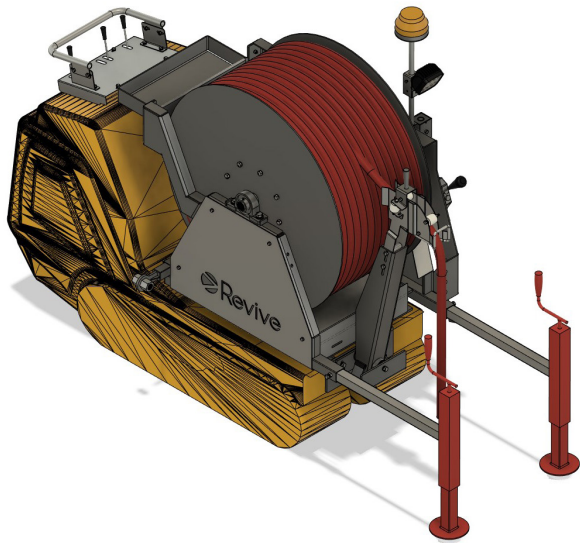

Renmak are a well-respected rental company, supplying specialist equipment to various organisations such as water authorities and utility companies in the United Kingdom.

Additionally, Renmak are an official distributor of USB Düsen in the UK, providing sewer cleaning nozzles to customers across the country.

THE ALL-NEW REVIVE
REMOTE
Reel

The Revive Remote Reel boasts an exceptionally low centre of gravity, providing unparalleled stability and traction on even the most difficult areas of terrain.

The Urban-Sweeper S2.0 marks a new era in electric road sweepers. It is the first fully electric road sweeper that releases zero emissions and is engineered by Boschung.

The Urban-Sweeper S2.0 is a 2m³ sweeper that combines convenience and suction power with the most advanced technologies available.

Revive are the official sales and service partner for IBAK in Ireland.

IBAK's modular system allows for unrivalled versatility and includes 4K cameras, cutters, and grinders.

We also provide vehicle fit-outs that incorporate any of the adaptable and interchangeable products in the IBAK range.

Revive is the official distributor for USB Sewer Cleaning Nozzles in Ireland.

We carry the entire line of USB DÜSEN products, which are made from high-grade stainless steel and precision engineered in Germany.

The USB brand is renowned for its long-lasting durability and superior cleaning performance, with over 30 years of experience in the industry.

Renmak are also the official distributor for USB Nozzles in the UK.

KEVIN O'CONNELL

Experienced CCTV Manager with over 20 years in the field, having expertise in various aspects of the industry.

Scania remain the preferred choice of chassis manufacturer across the entire range of Revive units.

We have supplied customers with units on Scania chassis across the globe and regularly trust Scania for our UK rentals in Renmak's fleet.

The Scania P-series has been a trusted component of all Revive projects from day one.

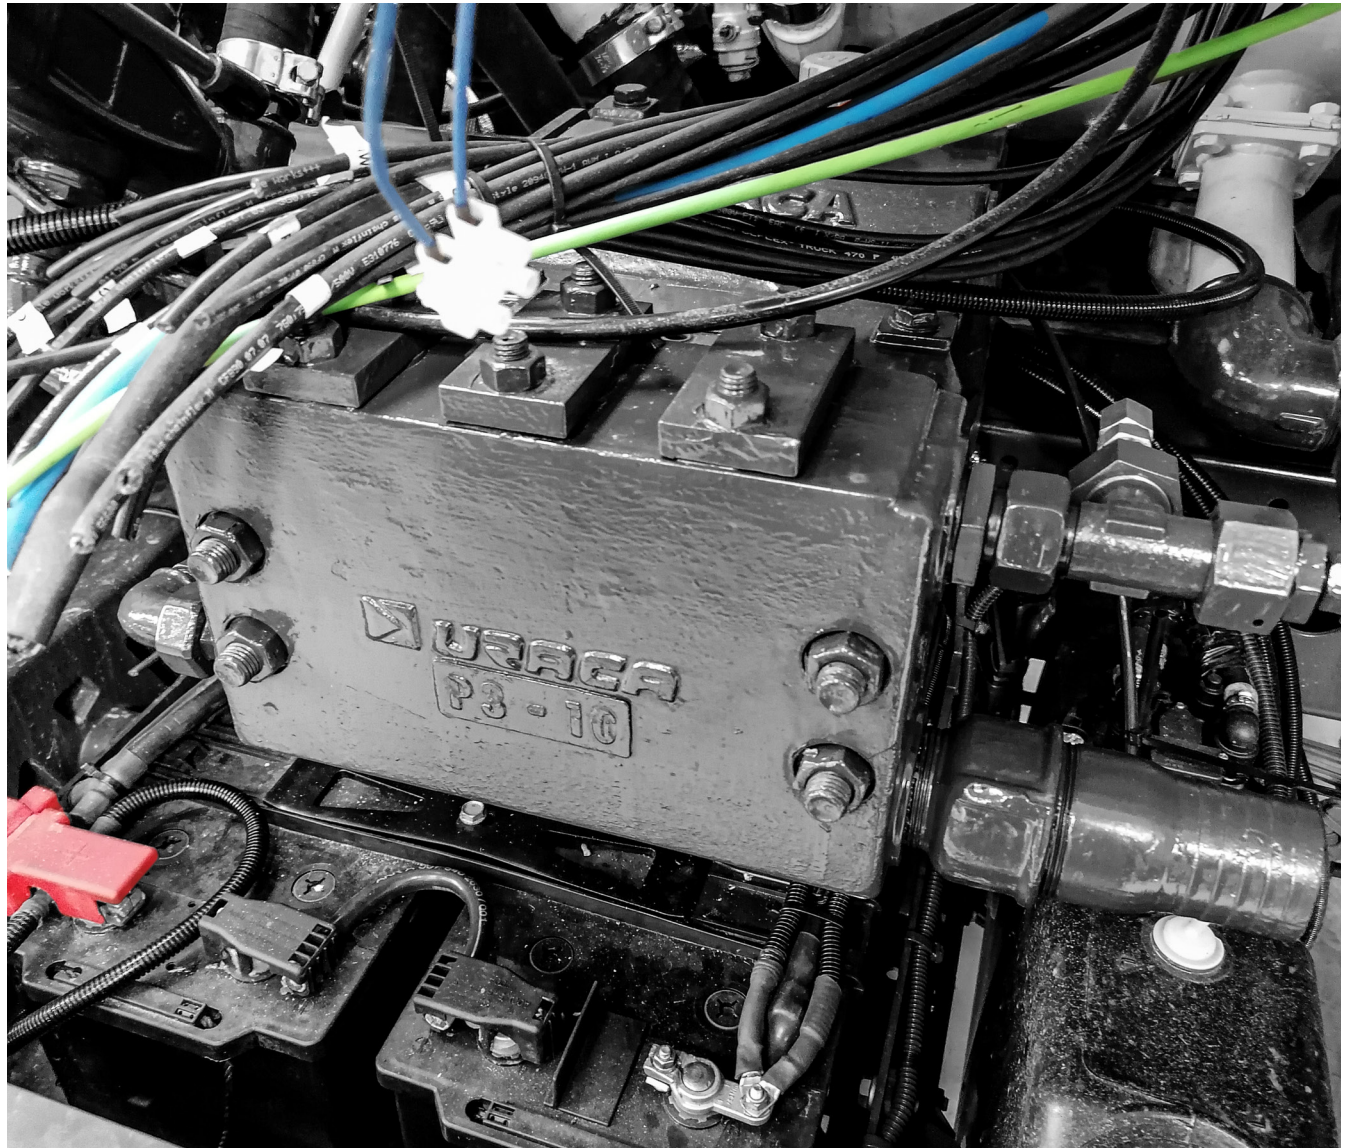

URACA is one of the pioneers in the field of high-pressure technology, more precisely in high-pressure and ultra-high pressure pumps.

For over 125 years, URACA have been developing and manufacturing pumps at the highest technical level.

URACA products are in use worldwide for many different high-pressure applications and have proven themselves for years in manufacturing, production and cleaning processes.

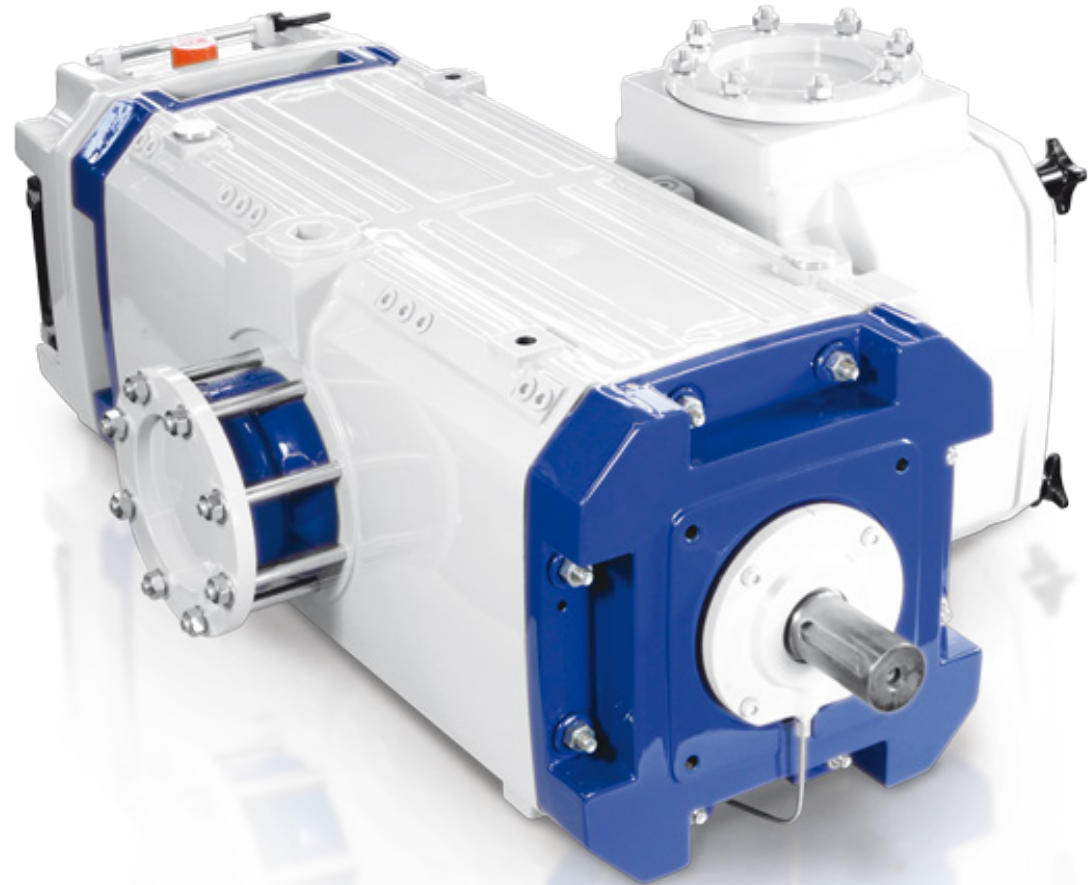

Liam Kearney and Michéal Boyle have a long and constructive association with CVS Engineering.

The low life-cycle costs of all CVS products aligns perfectly with our vision for Revive. Providing efficient and economical machinery.

As our production levels increase, so too will our demand for quality products and equipment.

Our history and knowledge of CVS gives us confidence that this will be a seamless and productive solution, ensuring quality for our customers.

SIMPLE SOLUTIONS

The Revive Group takes great pride in being able to adapt to the needs of our clients. Our remanufactured units can be tailored to meet any specific requirements and we always do our best to meet any individual requests.

We aim to respond promptly to any enquiries and make every effort to keep the ordering process as simple as possible.
